

Sub C6
23

providing verbal prompts to callers;
receiving data for callers from said remote terminals in response to said verbal
prompts;
storing said data for callers with an identifiable relationship to each caller;
performing a credit verification on each caller based on data received for callers;
and
testing said calling number identification data to specify a basis for entitlement
defining a limit on use, for restricting the extent of access to said system for a respective
one of said certain of said individual callers.--

R E M A R K S

This amendment is the result of a preliminary review of the case. Entry is respectfully
requested.

Respectfully submitted,
Ronald a. Katz Technology Licensing, L.P.
